DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1 and 16 to 22, drawn to a voice code conversion apparatus comprising code separating means for separating a voice code based upon a first voice encoding method, and means for multiplexing codes based upon a second voice encoding method, classified in class 704, subclass 230.
 - II. Claims 2 to 15, drawn to a voice code conversion apparatus comprising LPC code conversion means for dequantizing a first LPC code according to a first voice encoding method, pitch-lag conversion means for converting a first pitch-lag code to a second pitch-lag code according to a second voice encoding method, and noise code conversion means for converting a first noise code to a second noise code according to a second voice encoding method, classified in class 704, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as for a voice code conversion apparatus that converts from a first voice encoding method to a second voice encoding method according to adaptive differential coding or

pulse code modulation (e.g. speech coding that doesn't rely upon linear prediction coding, pitch-lags, or a CELP standard) by separating and multiplexing codes. See MPEP § 806.05(d).

- 3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as for a voice code conversion apparatus that operates according to a CELP standard having pitch and noise codebooks for converting codes without multiplexing for transmission. See MPEP § 806.05(d).
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Application/Control Number: 09/818,355 Page 4

Art Unit: 2654

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin Lerner whose telephone number is (571) 272-7608. The examiner can normally be reached on 8:30 AM to 6:00 PM Monday to Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil can be reached on (571) 272-7602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
